

P♦MET 730

Arc Spray Wire

DESCRIPTION

P♦Met 730 is an 316 stainless steel wire specifically designed for arc spraying. It produces dense, well-bonded coatings with excellent machineability and wear and corrosion resistance. **P**♦Met 730 is widely used for machine element repair, dimensional restoration and wear resistance applications. It has relatively high shrink characteristics and should not be used for coatings over 0.075 inches thick.
